KNIGHT EDUCATIONAL PRODUCTS EXPANDS TOOL KIT PRODUCT OFFERING FOR EDUCATIONAL AND SKILLED TRADE PROFESSIONALS

DALLAS, TX (October 10, 2007) – Knight Educational Products, a global manufacturer of electronic equipment and components, has expanded its product offering to include a series of tool kits and equipment for technical students, electronic service technicians, field service technicians, electricians, welders, and other skilled trades. The tool kits can be assembled to meet individual requirements and can easily accommodate a broad range of tools for maximum economy. Ideal for a variety of applications including automotive, A+ certification, computer networking, electrical, fiber optics, telecommunication, HVAC/refrigeration and welding, the tool kits are available in a wide range of heavy-duty cases and space-saving soft packages.

“We are providing our customers with customized tool kits, which allows them to select and purchase only the tools that they need in their particular field, without being forced to purchase a tool set that contains equipment they will never use,” said David Luna, Vice President of Sales and Marketing for Knight Educational Products. “The tools and tool cases are rugged and designed to provide skill trade professionals with years of service and most kits come with tools that have a lifetime or limited lifetime warranty which this industry requires.”

As an example, one of the skilled trade tool kits for electronics can hold an assortment of devices, such as brush and scrapers, knife and hook, needle nose pliers, solder packs, 25W solder iron, solder iron holder and sponges, diagonal cutters, long nose pliers, and a set of 4 jeweler style screwdrivers.

KNIGHT EXPANDS TOOL KIT PRODUCT OFFERING FOR SKILLED TRADE PROFESSIONALS, PG.2
